FLOORPLAN

TUESDAY, MAY 23, 2017

-
- 8:00AM – 4:00PM** **SPOR PRIMARY AND INTEGRATED HEALTH CARE INITIATIVE RESEARCH DAY**
GOVERNOR GENERAL ROOM, MEZZANINE LEVEL/SECOND FLOOR
- The purpose of this event is to fulfill in part the knowledge translation goals of SPOR PIHCI. The research results from the seven, first-round recipients of CIHR SPOR PICH I “Quick Strike” grants will be presented. From there, structured discussions on next steps for research and priorities will be the focus. Once complete, SPOR PIHCI will have a more defined priority list to support the next stage of research projects.
-
- 1:00PM – 2:30PM** **FOOD LITERACY - A FRAMEWORK FOR PROGRAM PLANNING, POLICY AND MEASUREMENT**
HARRIS ROOM, CONVENTION LEVEL
- This session will work towards shifting public health practice to a comprehensive focus on food literacy at both a program and policy level. At the end of the session, participants will be able to
- 1) Describe the prioritized attributes of food literacy identified by the Food Literacy Locally Driven Collaborative Research Project,
 - 2) Apply a food literacy framework to determine what attributes can be addressed or enhanced, including the Social Determinants of Health, by discussing novel practice-based chronic disease programming in public health targeting priority populations,
 - 3) Propose action-oriented policy recommendations for food literacy work in Ontario through practice-based case studies and discussion,
 - 4) Facilitate input on how workshop participants anticipate using a validated tool to measure food literacy across diverse work/practice settings in Ontario.
- Presented by:
- **ELSIE AZEVEDO PERRY**, MSc, RD, Haliburton, Kawartha, Pine Ridge District Health Unit (Project Lead);
 - **HEATHER THOMAS**, PhD, RD, Middlesex-London Health Unit (Co-Lead)
-
- 1:00PM – 5:00PM** **MAKING AN IMPACT: A KNOWLEDGE TRANSLATION WORKSHOP FOR GRADUATE STUDENTS**
TOM THOMPSON ROOM, CONVENTION LEVEL
- *This session hosted by the CAHSPR Student Working Group and CAHSPR Collaborative Healthcare Improvement Partnerships (CHIPs) Theme Group*
- This interactive workshop aims to provide graduate students with knowledge and concrete tools and skills in knowledge translation, and to assist students with applying these learnings to their own work. Participants will also benefit from shared learning about different ways to apply KT in academic research.
-
- 3:00PM – 5:00PM** **ANNUAL SCIENTIFIC MEETING OF THE CANADIAN ASSOCIATION FOR RURAL HEALTH RESEARCH**
LISMER ROOM, CONVENTION LEVEL
- The Canadian Association for Rural Health Research brings together all those researchers and research users who are interested in studying the health of rural and northern Canadians from a wide variety of methodological and disciplinary perspectives. The meeting will combine a number of presentations and roundtables that have, in the past, been the subject of our annual two-day scientific conference with our Annual General Meeting and a meeting of our executive. Both the scientific portion of the session and the AGM are open to anyone who wishes to attend.
-
- 4:00PM – 5:00PM** **PRIMARY HEALTHCARE THEME GROUP MEETING AND AGM**
SIMCOE ROOM, LOBBY LEVEL
- Participants interested in learning more about the Primary Healthcare CAHSPR Theme Group are welcome to attend this meeting.

STUDENT CONFERENCE PRIMER SESSION CARMICHAEL ROOM, CONVENTION LEVEL

**THIS SESSION ORGANIZED BY THE CAHSPR STUDENT WORKING GROUP*

The CAHSPR-SWG Pre-Conference Primer is a great way for new and returning attendees to become acquainted with the annual CAHSPR Conference! You are invited to join Denis Roy (CAHSPR President), along with Chris Power (CAHSPR President-Elect) and Frank Markel (CAHSPR Executive Director) as they provide an overview of the conference and discuss the significance of this year's conference theme. This is also a great opportunity to hear about CAHSPR's latest initiatives and to ask any questions to the CAHSPR leadership.

Presented by:

- **DENIS ROY**, President, Canadian Association for Health Services and Policy Research;
- **CHRIS POWER**, President and CEO, Capital Health;
- **FRANK MARKEL**, Executive Director, Canadian Association for Health Services and Policy Research.

6:00PM – 7:30PM

WELCOME RECEPTION FOYER, TORONTO BALLROOM, CONVENTION LEVEL

Join the planning committee and conference participants for some refreshments as we kick off another exciting CAHSPR Conference!

TRANSCENDING THE “PARADIGM FREEZE”: STRATEGIES FOR HEALTH REFORMS IN CANADIAN PROVINCES

TORONTO BALLROOM, CONVENTION LEVEL

Healthcare reforms are on the political agenda in all OECD countries. Canada stands out for its enduring challenges in achieving significant reforms. In this opening panel, we will explore narratives of reforms in various Canadian provinces to assess potential and limitations of current strategies. This session focuses on the question of whether it is possible to transcend the paradigm freeze? Speakers will share their perspectives on this challenge. What do the evidence and experience suggest? What are the challenges for the provinces and the Canadian federation? Where to start and to achieve what?

Presented by:

- **JEAN LOUIS DENIS**, Professeur titulaire, Chaire de recherche du Canada, DGEPS - École de santé publique, Université de Montréal et Chercheur-CRCHUM;
- **JANET KNOX**, President and CEO of Nova Scotia Health Authority;
- **ROBERT S. BELL**, Deputy Minister, Ministry of Health and Long-Term Care, Ontario

Moderated by:

- **CHRIS POWER**, CEO, Canadian Patient Safety Institute

CAN A NATIONAL PHARMACEUTICAL STRATEGY ACHIEVE THE PHARMACEUTICAL TRIPLE-AIM: ACCESS, AFFORDABILITY, AND APPROPRIATENESS FOR ALL CANADIANS

TORONTO BALLROOM, CONVENTION LEVEL

The World Health Organization recommends that countries coordinate their pharmaceutical policies to meet their obligation to provide universal access to safe, affordable and appropriately prescribed medicines. The case for a coordinated pharmaceutical strategy is particularly strong in Canada, where policies critically important for managing pharmaceuticals are controlled by different levels of government. This session focuses on the question of whether a national pharmaceutical strategy can be devised to achieve the pharmaceutical “triple-aim”: access, affordability, and appropriateness for all Canadians. Speakers will share three perspectives on this challenge. What does the evidence suggest? What are the challenges within the Canadian federation? What is the art of the possible in this area?

Panelists:

- **DANIELLE MARTIN**, Vice-President of Medical Affairs & Health System Solutions, Women’s College Hospital
- **STEVE MORGAN**, Professor, School of Population and Public Health, University of British Columbia
- **ANTONIA MAIONI**, Professor, Department of Political Science, Institute for Health and Social Policy, McGill University

Moderated by:

- **ADALSTEINN BROWN**, Director, Institute of Health Policy, Management and Evaluation, University of Toronto

SUB-PLenary SESSIONS

1. LEARNING WITH PATIENTS: RESEARCH TRAINEES AND EARLY CAREER INVESTIGATORS ENGAGING PATIENTS IN HEALTH SERVICES RESEARCH.

HARRIS ROOM, CONVENTION LEVEL

The Ontario SPOR SUPPORT Unit (OSSU) was established as a partnership between the Government of Ontario and the Canadian Institutes of Health Research (CIHR) to implement the national Strategy for Patient-Oriented Research (SPOR) in Ontario with an overarching goal to translate health research evidence into improved health outcomes for Canadians. Particular emphasis is placed on patient engagement in research and the generation of a strong evidence base upon which to formulate health policy and decision making. Accordingly, the aims of this session are to: Create an opportunity for trainees (Masters, PhDs and PDFs) and early career investigators conducting patient engaged POR research to network with colleagues, OSSU Centre leads and Ontario Ministry of Health and Long Term Care representatives; Promote OSSU Centre resources and the POR approach to health services research; and, Provide feedback and advice designed to further develop and advance the programs of research presented at the session.

Moderated by:

- **VIDHI THAKKAR**, Doctoral Candidate, Institute of Health Policy Management and Evaluation, University of Toronto;
- **FRANCES MORTON-CHANG**, Post-doctoral fellow, Institute of Health Policy Management and Evaluation, University of Toronto

4:00PM – 5:15PM

SUB-PLenary SESSIONS (CONTINUED)

2. TRAINING FOR IMPACT. PHD MODERNIZATION AS A KEY RESOURCE FOR LEARNING HEALTH SYSTEMS

CARMICHAEL ROOM, CONVENTION LEVEL

The complexity and multitude of challenges facing governments and health system organizations, coupled with the emergence of learning health systems, requires a new cadre of doctorally prepared individuals with the skills to work within the system to drive evidence-informed improvement at all levels. Sophisticated research and analytic expertise, leadership skills, and change management experience are needed to help design, implement, evaluate and spread evidence-informed solutions and guide innovation. Doctoral training programs have an essential role to play in building this capacity, especially when done in partnership with health system organizations working to effect change. Canada's current training programs, however, were designed first and foremost to prepare graduates for traditional academic careers. Modernization of these programs is needed to expose trainees to the benefits of career paths in health system settings, equip trainees with a new set of competencies designed to prepare them for success in these complex and dynamic environments, and provide trainees with hands on experience and networking through experiential learning opportunities. AcademyHealth in the United States has been at the forefront of training modernization efforts and, inspired by their success and other similar programs taking root around the world, the Canadian Alliance for Health Services and Policy Research (CHSPRA) recently launched a Training Modernization Strategy for Health Services and Policy Research in Canada.

Join training modernization leaders from the United States and Canada for a conversation about the impacts that training modernization efforts can bring, the strategies that underpin successful modernization, and opportunities to engage in Canada's efforts.

Moderated by:

- **ROBYN TAMBLYN**, Scientific Director, CIHR Institute of Health Services and Policy Research

Presented by:

- **LISA SIMPSON**, CEO AcademyHealth
- **PAUL WALLACE**, Senior Scholar, AcademyHealth;

WHAT'S CANADIAN ABOUT MEDICARE? A COMPARATIVE PERSPECTIVE ON HEALTH POLICY

TORONTO BALLROOM, CONVENTION LEVEL

Dinner & Justice Emmett Hall Laureate Keynote

Canada's sector-based approach to public coverage of health care, and its single-payer model for physician and hospital services, are unique among advanced nations. In addition, these features of the Canadian system have persisted relatively unchanged, while other national systems including those of the USA and Britain, have gone through one or more episodes of major reform since their founding. How do we explain this Canadian 'exceptionalism,' and what does it bode for the future?

FROM A PARADIGM FREEZE TO A LEARNING HEALTH CARE SYSTEM TORONTO BALLROOM, CONVENTION LEVEL

This session will focus on the concept of condition-based networks or learning health care networks as a strategy to break down silos and become more patient-centered by focusing on the continuum of care in order to better meet the needs of patients and decision makers. It is expected that this approach will enhance value through the rapid uptake of new therapies and promotion of best practices. Networks assist in setting objectives and promoting the scaling and spread i.e. innovations throughout the health system.

2018–19 HARKNESS FELLOWSHIPS in HEALTH CARE POLICY and PRACTICE

Call for Applications

THE COMMONWEALTH FUND AND CANADIAN FOUNDATION FOR HEALTHCARE IMPROVEMENT (CFHI) invite promising mid-career professionals—government policymakers, academic researchers, clinical leaders, hospital and insurance managers, and journalists—from Canada to apply for a unique opportunity to spend up to 12 months in the United States as a Harkness/CFHI Fellow in Health Care Policy and Practice. Established by The Commonwealth Fund in 1925, the Harkness Fellowships were modeled after the Rhodes Scholarships and aim to produce the next generation of health policy leaders in participating countries.

Fellows are placed with mentors who are leading U.S. experts at organizations such as Harvard University, Stanford University, Kaiser Permanente, and the Institute for Healthcare Improvement to study issues relevant to The Commonwealth Fund's mission to support a high performing health care system—insurance coverage, access, and affordability; health care delivery system reforms (e.g., bundled payments, accountable care organizations, innovative approaches to care for high-need/high-cost patients); cost containment; and other critical issues on the health policy agenda in both the U.S. and their home countries. A peer-reviewed journal article or policy report for Health Ministers and other high-level policy audiences is the anticipated product of the fellowship. Harkness Fellows have published their findings in top-tier journals, including: *BMJ*, *Health Affairs*, and *New England Journal of Medicine*.

The Commonwealth Fund brings together the full class of fellows—from Australia, Canada, France, Germany, the Netherlands, New Zealand, Norway, and the United Kingdom—throughout the year to participate in a series of high-level policy briefings and leadership seminars with U.S. health care leaders.

Building on their fellowship experiences, Harkness Fellows have moved into senior positions within academia, government, and health care delivery organizations, making valuable contributions to health policy and practice at home and in the United States.

EACH FELLOWSHIP WILL PROVIDE UP TO U.S. \$130,000 IN SUPPORT, which covers roundtrip airfare to the U.S., living allowance, project-related travel, travel to fellowship seminars, health insurance, and U.S. federal and state taxes. A family supplement (i.e., approximately \$60,000 for a partner and two children up to age 18) is also provided to cover airfare, living allowance, and health insurance.

“

Harkness Fellows as well as U.S. and international health policy experts have opened my eyes to the opportunities for us to learn from each other and to apply our knowledge to improve our own healthcare systems. My fellowship, based in Washington D.C. at the Office of the Assistant Secretary for Planning and Evaluation, provided me with an extraordinary opportunity to work with senior Administration officials and study bundled payments, one of the many innovative reform strategies being piloted in the United States. The experience gave me crucial insights into how the U.S. government implements and evaluates health policies, enriching my own research and thinking about knowledge translation of health system funding reforms.

CREATING EVIDENCE TO TRANSFORM ONTARIO'S
HEALTH CARE SYSTEM THROUGH HIGH-IMPACT
PATIENT ORIENTED RESEARCH

OSSU Can Help!

The Ontario SPOR SUPPORT Unit (OSSU) can help you plan, conduct and use Patient Oriented Research that will generate evidence to guide health policy decision making and improve the health of Ontarians.

Before they became *target audiences, stakeholders, and populations*, they were—and remain—*people*. Patients, families, physicians, nurses, and staff each have experiences that matter equally and differ greatly. We help you see them as real, live, actual people. This is more than data. It's [human understanding](#).

Twitter: How To

To create an account

- Go to <http://twitter.com> and find the sign up box, or go directly to <https://twitter.com/signup>
- Enter your **full name**, **email address**, and a **password**.
- Click **Sign up for Twitter**.
- On the next page, you can select a **username** (usernames are unique identifiers on Twitter) — type your own or choose one Twitter has suggested. They will tell you if the username you want is available.
- **Double-check** your name, email address, password, and username.
- Click **Create my account**.
- Twitter will send a **confirmation email** to the address you sign up with, click the link in the email to confirm your email address and account.

Find and follow others

The next step is to find and follow other interesting Twitter accounts. Look for businesses you love, public service accounts, people you know, celebrities, or new sources that interest you. **TIP:** One great way to find accounts to follow is to see who those you admire are following. You find accounts by using the search tool.

Check Your Timeline: See what's happening

Tweets from those you follow will show up on your Twitter homepage - called your **Timeline**. New Tweets will show up every time you log on. Click links in others' Tweets to view articles, images or videos they've linked to. Click hashtagged ^ keywords to view all Tweets about that topic.

Start Tweeting!

It can be fun and exciting to contribute to your own Twitter content! When people get interested in what you are Tweeting, they may follow YOU to see what you have to say! Here are some tips to get started:

Build a Voice: Retweet, Reply, React

Use existing **Tweets** on Twitter to find your own voice and show others what you care about. **Retweet** messages that you love, or **@reply** with your reaction to a Tweet you find interesting.

Mention: Include Others in Your Content

When you're ready to make your own **Tweets**, consider mentioning others by using their Twitter username (preceded by the @ sign) in your **Tweets**. This will draw more eyes to your message and might even start a conversation!

Tweet Regularly

The best way to gain followers is to engage and contribute by **Tweeting** regularly in a meaningful way.

#Hashtag

Definition: The symbol, called a hashtag, is used to mark keywords or topics in a Tweet. It was created organically by Twitter users as a way to categorize messages.

- Tweeters use the ^ symbol before a relevant keyword or phrase (no spaces) in their **Tweet**.
- Clicking on a ^ work in any message shows you all other **Tweets** marked with that keyword.
- The ^ can be used anywhere in the **Tweet** - beginning, middle, or end.
- Words that have a ^ become very popular and are often Trending Topics.
